

# KILLZONE 2

## TROPHY GUIDE

©PLAYSTATION CHAT PODCAST

## Ye Olde Platinum Trophy

### **Platinum Trophy - War Hero**

#### **Unhidden**

Collect all Killzone®2 trophies

*Here's the Target then, KZ2's Final Trophy. It's not easy by any means, it'll be more difficult (Though probably less time-consuming) than Uncharted's or Fallout 3's, but you ought to have less trouble than with WaW's. That said the Honour Ranks might prove a Barrier for some. Nonetheless, onwards!*

## Campaign Trophies

The next 10 Trophies are all simply for completing their Respective Missions, with the final one for completing the Campaign on any Difficulty. These are followed by a Trophy for completing them all on Elite, and one for completing them all without Dying. I recommend you get one playthrough on Recruit to experience the Game, and acquire the initial 10 (Perhaps Destroy the Icons and Collect the Intel here too), then finish them without Death, and finally do them on Elite.

### **Bronze Trophy Corinth Ribbon**

#### **Unhidden**

Complete Corinth River on any difficulty level

### **Bronze Trophy Blood Ribbon**

#### **Unhidden**

Complete Blood Meridian on any difficulty level

### **Bronze Trophy Visari Ribbon**

#### **Unhidden**

Complete Visari Square on any difficulty level

### **Bronze Trophy Salamun Ribbon**

#### **Unhidden**

Complete Salamun District on any difficulty level

### **Bronze Trophy Bridge Ribbon**

#### **Unhidden**

Complete Salamun Bridge on any difficulty level

### **Bronze Trophy Suljeva Ribbon**

#### **Unhidden**

Complete Suljeva Village on any difficulty level

### **Bronze Trophy Tharsis Ribbon**

#### **Unhidden**

Complete Tharsis Refinery on any difficulty level

### **Bronze Trophy Cruiser Ribbon**

#### **Unhidden**

Complete The Cruiser on any difficulty level

## **Silver Trophy Maelstra Ribbon**

### **Unhidden**

Complete Maelstra Barrens on any difficulty level

## **Silver Trophy Survivor**

### **Unhidden**

Complete all missions on any difficulty level

## **Silver Trophy Untouchable**

### **Unhidden**

Complete all missions on any difficulty level without dying

*This ought to be pretty easy. If you've played through before you should have already got a few Nil Death Runs. So go to Level Select, Pick one, then find the 1st Section with a Death and play through it on Recruit, once you reach the Next Section you can quit and move on a couple of Points if the following Section is already at 0, or you can just keep going from there. Should you die you simply need to press Start and click 'Restart Section', do NOT 'Restart Checkpoint', as this will not count. Note that using the Knife here will grab you a Bunch of Melee Trophies too, plus it's great fun, and a good Tension Reliever in between those Elite Runs.*

## **Gold Trophy Heroic Survivor**

### **Unhidden**

Complete all missions on Elite difficulty level

*Ah, deary me. There's a bunch of guides on this if you're having trouble. But I can give you a few Basic Tips. Keep Calm, take regular breaks Online, working on some other Trophy, or having a Brew if you're getting stressed. Make sure you're not omitting any of your arsenal, your Knife and Grenades especially. Be Patient, and never shoot from an uncovered position except for some circumstances, if you really must charge the enemy, use that Blade. If you really can't get past a bit, and no Guide on the Earth is helping, feel free to ask by visiting our website ([www.playstationchat.netii.net/](http://www.playstationchat.netii.net/))*

*For the last level there is also guide later on in this trophy guide.*

## **'Boss' Trophies**

These are all Hidden, and require you to Kill a Significant enemy(ies) - often within a Time Limit. I've ordered them by point where you should get them. Take these on Recruit.

## **Bronze Trophy Treadhead**

### **Hidden**

Take 30 Helghast lives whilst using the ISA tank

*Load from Corinth River, Korovis Dam.*

*Easy, get in the Tank and break out that Machinegun. Zoom in and hose everything down, some easy Kills on the Helghast in the Bunkers and whatnot.*

## **Bronze Trophy Giantslayer**

### **Hidden**

Kill the Blood Meridian heavy in under 1 minute

*Load from Blood Meridian, Heavy Canal.*

*Simple enough. Someone decided to fit this Drug addled Moron with an explosive Tank on his Back. So all's well. Ignore his back up and gently squeeze a few well placed shots at his Head till he recoils, then run in (Keep an eye on his Support Troop though) and quickly empty most of your Clip into that Tank. When he spins back reload while he settles and gets firing again, then get a sparse few rounds into his Skull once more, when he Recoils again finish him with the rest of that Magazine. Job done.*

## Bronze Trophy Dragonslayer

### Hidden

Destroy the Salamun Bridge ATAC in under 1 minute 30 seconds

#### ***Load from Salamun Bridge, Academy Rooftop.***

*Bit trickier, straight away nab that Rocket Launcher, then jump off the edge to your right and spin Left, run into that little corridor. Switch to your Revolver and find the ATAC. It ought to be somewhere around the Middle so run out to lure over to you. Wait till it's directly above the 3 Power Cells, then get a Revolver Hit on one. Quickly switch to the Rocket Launcher and fire 2 at it. Don't Miss! Make sure you reload and get the ammo in the corridor, then switch to the M4 and take cover again, watching the ATAC. Here it launches a rather nasty Missile Barrage, but as long as you're in the Corridor you should be safe (Though possibly near Death). Try and lure it again if need be. Then finish it.*

## Bronze Trophy Elementalslayer

### Hidden

Kill the Tharsis Refinery ArcTrooper in under 1 minute 30 seconds

#### ***Load from Tharsis Refinery, Lower Refinery Complex.***

*Right, soon as the Cutscene ends run out and get behind the container on your left. Wait till the Petrusite Container overhead gets close enough (Don't give him time to move behind any containers) then shoot it down and sprint behind him. You ought to be able to get an entire clip into the Tanks on his back, then quickly reload and shoot the next container (No real need to take Cover), then finish him.*

## Bronze Trophy Spare Parts

### Hidden

Destroy all Leech Pods in The Cruiser

#### ***Load from The Cruiser, Air Traffic Control.***

*Make sure that you only concentrate on leechpods to begin with. They are ejecting from two Helghast ships; one on the right (first) and one on the left (second).*

## Bronze Trophy Mechspert

### Hidden

Stomp 10 Helghast with your Exoskeleton in Maelstra Barrens

#### ***Load from Maelstra Barrens, Industrial Ghost Town.***

*Nothing really. Just run at Helghast Infantry. Maybe jump on them for some variation.*

## Bronze Trophy Can Opener

### Hidden

Destroy any Helghast APC during battle

#### ***Load from Maelstra Barrens, Cargo Impact Site***

*On the first level (on recruit difficulty) after destroying the bridge keep a fully loaded rocket launcher and swap it with the M82 assault rifle when you get to the beach head that you need to secure. After killing the Helghast use your fully loaded rocket launcher to destroy any of the two APCs. OR on the last level when you have to destroy the Helghast towers there is an APC which Rico will tell you to destroy.*

## Bronze Trophy Demonslayer

### Hidden

Kill Radec at Visari Palace within 20 minutes

#### ***Load from Visari Palace, Autarch's Sanctum.***

*Lot harder than it sounds, but certainly managable. I would recommend using the Knife and just slicing up everyone, before downing Radec, but after suggesting such a Theory (Albeit on Elite) and seeing the responses that may not be wise.*

#### ***This is my strategy for killing the bastard on Elite***

*"Knife the 2 people that come down the stairs. Knife the Pyro troops. At the top of the stairs take cover exactly in the center of the middle balcony. Use the Grenade Launcher to wipe out the troops below. Now wave 2 will come. Keep your Nade Launcher and run to the stairs (any side) and knife the 2 soldiers coming up, now do the same on the other side. Use the Sniper to stop Radec if he is annoying you and also use it to finish off the troops below. DO NOT USE ALL ITS AMMO. Now pick up the flamethrower, should have 200*

*Fuel. Go to the left staircase and take cover in the far corner. Flame the elite troops as they come up and use nades. When I did it there were no soldiers on the other side, I think they all go for you at the one staircase. Watch out for nades and if any troops do break through then pistol and melee them. Now head back to the center of the balcony (where you are invulnerable from the troops below) and M327 or snipe the remainders. Now the doors will open and Rocket Firing Support troops will emerge. Pick up the sniper and take out a couple. Keep moving along the back of the balcony and make sure any troops below can't hurt you. A cutscene will be triggered and this will mark a checkpoint. The vehicle that comes in the window destroy the right barricade on the balcony so equip the knife and slash all the RL troops. They won't shoot when you are close to them. Knife Radec if you can so that he is no hassle. Clean up the rest and it's on to Radec. Sit in the back right corner on the balcony with a sniper. When he tries to knife you you must run in circles around him, this will stop him from hitting you. When he is at a distance the sniper will prove superior to his LMG. After a couple of cycles he will teleport to the far side of the hall. Two more sniper shots and he's dead."*

## **'Hunting' Trophies**

These 7 Require you to Find/Kill/Revive so many Objectives.

### **Bronze Trophy - Field Agent**

#### **Unhidden**

Collect all intel within the game

See 'Iconoclast'

### **Bronze Trophy - Iconoclast**

#### **Unhidden**

Destroy all Helghast symbols within the game

*These are fairly easy to find if you're looking but there's a Bunch of Guides on them if you don't have the time. Gamesradar's is nice, but unfortunately unordered. Using it in Conjunction with some YouTube Guides is recommended if you really must.*

### **Bronze Trophy - Safari Hunter**

#### **Unhidden**

Kill one of each enemy infantry type with a melee attack

*Based on this image you must Slash:*

1 - Advanced Shock Trooper - The Evac. Point at the Finale of the Tharsis Refinery, 3 Supporting a Commando.

2/3 - Advanced/Assault Infantry - Everywhere, how can you not Melee at least one of these guys? Just load an early Level if not.

4 - Commando - Salamun District, Dushan Loading Bay, Troop who Shotguns Garza after he opens a Door.

5 - Elite Shock Trooper - Swarming the Cruiser, there's a batch that come out of a Pod you'll be using later.

6 - Grenadier - The 'Grenade Jockeys' at Salamun Bridge

7 - LMG Trooper - Start of Visari Palace

8 - Miner - All over Suljeva Village

9 - Medium Mounted Gunner - Start of Visari Palace, on those mounted Guns.

10 - Mounted Gunner - Corinth River, Korovis Dam, the guys on the mounted Guns, with the Red Armbands.

11 - Pyro Trooper - During the Cruiser Heavy Battle or the fight with Radec.

12 - Rifleman - Salamun District, Light Shanties - Deployed from the Dropship during your 'Last Stand' with Garza.

13 - Shock Trooper - See Above

14 - Support Trooper - Corinth River, Verdran Overlooks East and West

15 - Sniper - Only found in Suljeva Village

### **Bronze Trophy - Pallbearer**

#### **Unhidden**

Kill 500 Helghast Soldiers

See 'Reaper'

### **Bronze Trophy Undertaker**

#### **Unhidden**

Kill 1000 Helghast Soldiers

*See 'Reaper'*

### **Bronze Trophy Reaper**

#### **Unhidden**

Kill 1500 Helghast Soldiers

*This ought to have been acquired by the time you've got the rest of the Trophies, if not, replay a quick kill segment such as Korovis Dam or Maelstra Barrens*

### **Bronze Trophy Babysitter**

#### **Unhidden**

Revive your buddies a total of 25 times

*Again, you should get this one after the rest, but it can be annoying otherwise. I recommend getting Garza in the open on Korovis Dam. Rico in Autarch's Sanctum is pretty good too.*

## **Kill Criteria Trophies**

These 14 are based on how you murder the enemy, again, go from Recruit.

### **Bronze Trophy Killing Spree**

#### **Unhidden**

Kill 5 Helghast in 15 seconds whilst on foot and maintaining at least 85% health

*Load from Blood Meridian, Verudran Alley.*

*Run up to the Walkways and let rip, if you're lucky you might get 'Run and Gunner' here too.*

### **Bronze Trophy Bullet Counter**

#### **Unhidden**

Manually reload your weapon 150 times

*Again, you should get this just playing. Otherwise simply load a level, fire, reload, repeat.*

### **Bronze Trophy Safety First**

#### **Unhidden**

Shoot off 100 Helghast helmets during battle

*Should have got this one too, if not, find a big Cover filled Firefight such as the ones on the Cruiser or Suljeva Village, and go for Headshots with an Assault Rifle*

### **Bronze Trophy Beserker**

#### **Unhidden**

Kill 25 Helghast using melee attacks

*Safari Hunter plus a few Knife runs from Verudan Alley will ensure you get this.*

### **Bronze Trophy Barrel of Death**

#### **Unhidden**

Kill 3 Helghast at once using the surrounding environment

*Load from Tharsis Refinery, Tharsis Station*

*Exit the train, move without being spotted to a spot with a clear passage to those 3, then run at them. Wait for the left one to move closer to you, then fire at the Petrusite. There is also a really easy bit at the beginning of Dushan loading bay.*

## Bronze Trophy Professional

### Unhidden

Get 3 headshots in a row using the same clip of M4 Revolver ammunition

*Go to stahl arms warehouse and instead of chucking a grenade take an easy headshot now run close hit once then shoot them in the head whilst they are stunned. This is very easy on recruit difficulty.*

## Bronze Trophy Fragmerchant

### Unhidden

Kill 5 Helghast at once using a single frag grenade

*Load from The Cruiser, Landing Bay.*

*Mess around with the Lifts, then, when you get to the floor where a craft burrows through with Elite Shock Troops, run up and start Cooking a Grenade, wait till they're all landed and moving, then get it in the middle, this'll take a few goes. For Fragmartyr simply do the same but hold onto the Grenade.*

## Bronze Trophy Fragmartyr

### Unhidden

Kill 2 Helghast at once and take your own life using a single frag grenade.

*See Fragmerchant*

## Bronze Trophy Melonpopper

### Unhidden

Get 15 headshots using the VC32 Sniper Rifle

*Load from Visari Square, The Square.*

*Follow Garza up to the Platform, then go Headhunting. Keep your Controller steady and get the Crosshairs right in the middle of their heads, not just at the side. Only go for Covered/Static Troops.*

## Bronze Trophy Blade Runner

### Unhidden

Kill 75 Helghast using the knife

*See Beserker*

## Bronze Trophy Run and Gunner

### Unhidden

Kill 3 Helghast using an M82 or StA52 assault rifle without releasing the trigger

*Load from The Cruiser, Landing Bay.*

*Go to the same spot as the 'Frag' Trophies, then sit at the Barrier opposite the Helghast Entry Point, once more, launch a tirade on their Heads. Alternatively see Killing Spree.*

## Bronze Trophy Defensive Fighter

### Unhidden

Kill 30 Helghast using the Sta3 fixed gun emplacement

*You should get this one on the way, otherwise load a Sta3 featuring Section (Korovis Dam, in fact most of Corinth River) and reload till Victory*

## Bronze Trophy Master Conductor

### Hidden

Electrocute 3 Helghast with a single burst from the VC5 Electricity Gun

*Load from Tharsis Refinery, Cross-Facility Shipping.*

*Unfortunately this'll take a bit of work, as the actual Point is miles away from the nearest VC5. Grab the one on a weapon Rack once the level loads and just keep sprinting, ignore the Drones, you're on Recruit right? Then, after the 'RIKOFUKSUP' Scene, run up the ramp to the left and unleash the best gun in the game on the 3 who are grouped together. Don't stop until you run out of ammo to be sure. OR as soon as you get the gun and have to climb the ladder to push a button (after the big giant-heavy-thingy) three Helghast will run in. There will be two on the balcony to the right and one will run to where the heavy was. Kill the on ground level with a burst then arc/spin to face the guys on the balcony and unleash hell on them. It really is that simple.*

## Bronze Trophy Stick Around

### Hidden

Nail 20 Helghast to a wall using the Boltgun VC-21

**Load from Suljeva Village, Maintenance Office.**

*This can be surprisingly time consuming and annoying. Grab the VC21, then just run round, ensuring that when you fire, a Helghast is perfectly in front of a Wall, it has to be exact, otherwise they'll just fall back off/be skewed. You might want to consider taking a break halfway to focus on another to break the tedium.*

## Multiplayer Ribbons

All these 10 must be acquired in the Warzone Feature of Killzone 2, and I can't really help you with these. Just focus on getting those Ribbons, and then mark out a week of 'No Life' for the Honour Ranks.

### Bronze Trophy Cross-Training Ribbon

#### Unhidden

Acquire all badge specific medals

#### This Encompasses:

*Trauma Surgeon*

*x8 Revival Specialist - Revive 5 Players per Game with the Medic's Defibrillator*

*Easy, find Mortally wounded people, use the D-Pad to switch to the 'Defibber', then hit 'em with a shot.*

*Forget whether it's a good idea, you don't care right?*

*Field Medic*

*x8 Healing Specialist - Heal 5 Players per Game with the Medic's Deployable Health Packs*

*Little bit harder, as they need to be still. Best bit is to lob them around a Search & Destroy Objective.*

*Defensive Specialist*

*x8 Turret Specialist - 5 Turret Kills per Game*

*These are pretty Tricky, Obie and rokafella are pretty good at placing them though, so perhaps ask for some tips off them. My preferred Tactic is to stick them behind Snipers though, such as the ISA Emplacement on HGH Industries. Repeat 5 times for Victory.*

*Field Mechanic*

*x8 Repair Specialist - Repair 5 Objects*

*This is nothing, look for those Wrench Symbols and repair stuff. Destroy it again if you wish then re-repair.*

*Spawn Authority*

*x8 Spawn Point Specialist - 5 Players Spawn on your Smoke Grenade per Game*

*Incredibly easy, people'll Spawn on anything that's further than the Original Spot, just lob 'em anywhere.*

*Aerial Supportive*

*x8 Air Support Specialist - 5 Air Support Kills per Game*

*Time to be honest here. I cheated. I cheated, and so should you. Until these usual Devices are patched to bloody work, it's not worth the huge amounts of luck and effort needed. Find a friend, and cheat goddammit.*

*Front Runner*

*x8 Boost Specialist - Use Boost 10 Times per Game*

*Now this works it's is pretty simple, though it's easy to underestimate 10 times. Just keep using Boost whenever it's charged and you'll be fine*

*Master of Disguise*

*x8 Disguise Specialist - Kill 5 Enemies while Disguised per Game*

**Note:** you don't have to Kill 5 every Disguise. This is culminative. So just get a Kill while Disguised, which is pretty easy, then recharge it and repeat. Just playing as a Saboteur should get you this

### *Explosives Expert*

*x8 C4 Specialist - Kill 5 Enemies using Proximity Mines per Game*

*This can be pretty tricky. Best bit is to find an open, frequently used Corridor (They explode even if an enemies round a corner, and thus are useless then) and lay down 2, 3 if you want to be safe. Especially efficient with the Scout's Cloak on Visari Hammer Search & Destroy.*

### *Shadow Marshal*

*x8 Cloak Specialist - Kill 5 Enemies while Cloaked per Game*

*if you can Snipe, and Snipe well, this will be no problem, though getting this in conjunction with Explosives Expert isn't a bad idea.*

### *Forward Observer*

*x8 Spot and Mark - Spot and Mark 5 Players per Game*

*Nothing, just get to an open spot, stand still, hit the D-Pad and repeat.*

### *Bronze Trophy Veteran Ribbon*

*Unhidden*

*Acquire all mission specific medals*

*This Encompasses:*

*Retrieval Corps*

*x8 Search and Retrieve - Return 2 Objectives per Game*

*Get Boost, then get those Objectives. Ignore the enemy.*

### *Bomb Squad*

*x8 Search and Destroy - Place/Defuse 2 Bombs per Game*

*Use the Snipers Cloak for extra Cover. Though all you really need is to find a small game and Plant both your teams.*

### *Assassin's League*

*x8 Assassination Kill - Kill the Enemy Target*

*A little trickier than most, either Headshot them with a Sniper (Gotta be pretty good though, and only really on long Sightline maps like HGH Industries or Pyrrhus Rise) or Charge in with a Saboteur/Assault*

### *Bodyguard Alliance*

*x8 Assassination Defend Ribbons - Survive as the Target*

*This one'll be annoying, as you need to be picked, which is Random. Go for small games is a good bet, and when you get the chance, don't waste, hide and keep moving even then.*

### *Corpse Counters*

*x8 Body Count - 10% of Kills in Body Count per Game*

*Kill. Kill. Kill. Suicide Runs (Dazmaz style) aren't a bad idea here.*

### *Defense Initiative*

*x8 Capture and Hold Ribbons - Kill 10 Enemies while in an Area*

*Easier than it sounds. Just sit inside one of these spots and Kill Enemies. Tharsis Refinery is quite good here.*

## **Bronze Trophy Expert Ribbon**

**Unhidden**

Acquire all combat specific medals

**This Encompasses:**

*Quick Draw*

*x8 Sidearm Specialist - 10 Pistol Kills per Game*

*There are Servers devoted to unlocking the Beautiful M4 Revolver, so simply go in those. If you must get it in a normal game (Like I insisted on doing) use the Defensive Specialist Medal Tactic of going behind Static Enemies such as Snipers.*

### *Hawk's Eye*

*x8 Sniper Specialist - 10 Sniper Rifle Kills per Game*

Just break out the VC32 and go nuts. Even if you're horrible at Sniping (Like most of K2, bah) this should be simple.

#### **Head Fetish**

*x8 Headshot Specialist - 10 Headshots per Game*

*If you can't get this regularly, then you really shouldn't consider Sniping as a Class to be using normally. But nonetheless, unless you're extremely proficient ignore moving Enemies, the great thing about your Two Abilities here is they give you all the tools you need to Track an Enemy, so do so till they stand still. Then BOOM. Other Snipers/Engineers Building are great Prey, and ensure your Scope is right in the middle, not just brushing the side either. Sometimes your Enemy may be behind an invisible Wall, so you may have to change Angle to get them.*

#### **Black Belt**

*x8 Melee Specialist - 10 Melee Kills per Game*

*Again, use the Tactic of getting behind Snipers/Mounted Gunners*

### **Bronze Trophy Wargod Ribbon**

#### **Unhidden**

Acquire all remaining medals

**This Encompasses, along with previous Medals:**

*Natural Born Killer*

*x8 Killing Specialist - Get 10 Kills per Game*

*Stop playing K2 if you cannot get this. In fact, stop playing Online, stop playing at all!*

#### *Example Soldier*

*x8 Good Conduct - 0 Penalty and 20 Points per Game*

*Don't commit Suicide, don't Teamkill and do Mediocre in a Game for this.*

### **Bronze Trophy Blitzkrieg Ribbon**

#### **Unhidden**

Win 50 online matches

*Just play a lot, and aim for those Wins, so suicidally dart in to retrieve Objectives regardless of the imminent death etc.*

### **Bronze Trophy Career Ribbon**

#### **Unhidden**

Achieve an online rank of General

*Go for Points, like I mentioned in the Brief.*

### **Bronze Trophy Valor Citation**

#### **Unhidden**

Achieve weekly online honor rank #1

*See 'Valor Grand Cross'*

### **Bronze Trophy Valor Medal**

#### **Unhidden**

Achieve weekly online honor rank #2

*See 'Valor Grand Cross'*

### **Bronze Trophy Valor Cross**

#### **Unhidden**

Achieve weekly online honor rank #3

*See 'Valor Grand Cross'*

## Bronze Trophy Valor Grand Cross

### Unhidden

#### Achieve weekly online honor rank #4

*Some help I can give on the Honour Ranks is to recommend using a Point Orientated Class, like a Medic with Repair, and trying to achieve Wins for that x1.5. Deaths aren't factored in remember so just go Points Hunting. Again, if you really must Stat Padding is an option, just don't expect any Respect you h4xX0rZ.*
